

## Results of August 2022

August was a bad month, again. BTC went down (-13.77%) and so did most other coins. Besides the losses, Nemesis was able to make a nice profit. Also Gaia finally did a move (buy followed by a sell a few days later), resulting in almost 2% profit.

All the details (including this report) can be found at [teamkronos.io](https://teamkronos.io).

- 1) Profits are based on USDT, which is the base-asset for every bot.
- 2) The month starts at 2am of the 1st day of the month and ends at 2am of the 1st day of the next month.
- 3) Most bots invest 100% in an asset, but some bots (like Hypnos) invests 10% in one asset, 10% in another and keeps (for example) 80% in USDT. A '10%' transaction is counted as 0.1 transaction.
- 4) Transaction costs are included in the results (obviously). These costs are 0.25% (0.2% transaction-fee + 0.05% spread). The 0.05% is an estimate that may differ from the actual spread (usually the spread is lower in reality). The estimate may explain differences between our numbers and Bots.io's numbers.
